Featured Products

Saunders®XA - key features:

1. Enhanced flex life, resulting in reduced down time and improved productivity, thereby equating to a lower cost of ownership.
2. Leak Free* [in accordance with the standards MSS-SP-88 and BS EN 12266-1.]
3. Maximized rebound resilience, leading to improved erosion resistance while maintaining the same high level of chemical resistance as previous Saunders EP and butyl-based diaphragms.

More info -> www.cranechempharma.com

Xomox®XLB - key features:

1. XOMOX® XLB offers an innovative stem sealing system, providing safety and long term fugitive emission control under extreme conditions.
2. Dynamic body joint design retains pressure boundary during thermal cycles.
3. Lower torque, smaller actuators, reduced costs, space saving.

More info - www.cranechempharma.com

Resistoflex®ATL - key features:

1. Resistoflex®ATL PTFE reduces permeation rates by up to 60% when exposed to aggressive chemical elements at high temperatures.
2. The outer shell delivers superior corrosion resistance in temperatures reaching 450°F.
3. Full vacuum rating up to 450°F on sizes 1" – 12".

More info -> www.cranechempharma.com

Krombach®MSBV - key features:

1. The Krombach MSBV offers an innovative interchangeable ball and seat design that virtually eliminates the need for simultaneous lapping.
2. The polygon stem-to-ball connection reduces stress within the valve and allows optimal torque transmission.
3. An additional sanitary feature is its self-cleaning system which removes excess particles and minimizes leakage potential.

WTA® Bellows Sealed Ball Valves - key features:

1. Superior fugitive emission protection for chemical processing applications, including Chlor-Alkali, Phosgene, and Fertilizer.
2. Compliant with Euro Chlor and Chlorine Institute Specifications for Bellows Sealed Globe Valves Chlor-Alkali applications.
3. Advanced safety sealing system consisting of multiple walled bellows, sealed two-part rising stem, and stellite coated, conically shaped piston and seat.

About the tradeshow

MINExpo INTERNATIONAL® 2012 is the World's largest mining show, scheduled for September 24-26 at the Las Vegas Convention Center.

More than 1800 exhibitors in twelve exhibit halls will display the latest technology, equipment, components, parts and services for exploration, extraction, safety, environmental remediation and preparation and processing of metallic ores, coal, industrial minerals and more. With more than 850,000 square feet of indoor and outdoor exhibit space, this show is a “can’t miss” opportunity that comes along only once every four years.

This year it features an education program with 20 sessions that will tackle the most pressing current issues affecting the mining industry, with many of the industry's top professionals leading the discussions. The information shared at these sessions—scheduled for the mornings of Tuesday, September 25, and Wednesday, September 26—will help you get ahead of the changes and developments affecting the mining industry in the USA and around the world.
